

GH3 Ceiling hoist

Discreet, smooth and safe

Ceiling-mounted hoist systems are often an ideal solution for lifting and moving people from one place to another in all kinds of care environments. With the lifting equipment mounted out of the way on the ceiling, you keep the floor space uncluttered and it's much easier, quicker and safer to get around.

Lifting systems of this kind can normally be mounted in virtually any indoor space and reach anywhere in any room, with furnishings and floor coverings no hindrance.

This approach also saves you time, as everything you need for effective lifting and moving is always in place, charged and ready to use as soon as it's needed. The result – more time for the care that really counts.

Guldmann ceiling-mounted hoist systems are world-renowned for

- Reliability – with built-in power sources and rapid, effective recharging
- Comfort – smooth starts and stops, as well as near-silent gliding movement
- Low cost of ownership – notably low operating costs, maintenance expenditure and energy consumption
- Responsiveness – always-on availability, prompt reaction times and dual-speed features
- Safety – sophisticated built-in safety systems, including emergency stop and lowering
- Ease of use – ergonomically correct control units that are comfortable and intuitive to use.

The result – benefits for everyone involved.

Reaching new heights

Mounting lifting modules in a rail on the ceiling brings a new dimension to the carer's working environment, with documented reductions in stress, strain and injury as well as a big difference in job satisfaction. They enable care staff to deal with most routine handling and lifting tasks on their own.

Ceiling-mounted lifting modules make heavy lifting much easier.

- The lifting equipment is always in place, ready to use immediately
- Much greater lifting height
- Greater freedom of movement and fewer weight limitations.

And if you're the user, you'll feel more comfortable and safe throughout.

Modules make a perfect fit – anywhere

Guldmann ceiling hoists are an integral part of a complete range of lifting equipment that includes rails, hoists and accessories, all designed as modules that work together perfectly. You can combine these modular sections to meet virtually any lifting requirement in any building.

Well-designed rail systems are essential for making sure hoists move quietly, smoothly and with a minimum of friction, using as little power as possible, right across the 200–500 kg capacity range. You can install Guldmann rail systems virtually anywhere, attached to ceilings or walls, or free-standing. You can set them up as a single track, to cover a complete room, or throughout any space you choose. You can opt for unsupported spans of as much as 8 metres, which helps keep interior spaces free of clutter.

The modular design also means you can alter and extend these rail systems as needs change, or reinstall them elsewhere if required. This all helps ensure a good investment that provides long-term benefits.
