Free-standing room covering rail system

– Easy, practical and safe

- **Easy to install and remove**
- **Suitable for temporary lifting needs**
- **Suitable for reuse**
- **Height-adjustable – max. height 284 cm (9'3")**
- **Requires no structural changes to the room or installation in walls or ceiling**
- **Frees up floor space and allows more room for the user and carer**

A mobile rail system that can be installed and removed quickly and easily as well as moved from place to place.

The system requires no structural changes to the room or installation in walls or ceiling, making it well-suited to temporary lifting needs in private homes, for example.

The free-standing rail system can easily be installed and removed by 1-2 people without the need for special tools.

The rail system is available in two standard dimensions, 3 x 3 meters (approx. 10' x 10') and 4 x 4 meters (approx. 13' x 13'), and is height adjustable up to a maximum of 284 cm (9'3").
